

1902 Willis Road S.E.
Huntsville, Alabama 35801

December 27, 1981

Congressman Ron Paul
ATTN: Mr. S. M. Griswald
Longworth House Office Building
House of Representatives
Washington, D.C. 20515

Dear Congressman Paul:

Please excuse my seemingly inordinate delay in answering your letter of November 12, 1981. I have only just received your letter from the A.A.M.S. Board of Governors.

Forwarded is a copy of my paper, "Tesla's Secret and the Soviet Tesla Weapons", in accordance with your request.

In addition, I've made a videotape, one hour and 40 minutes long, on the same subject. -- A copy of ~~this~~ tape has been sent to Lieutenant Colonel John Alexander in Washington, D.C. A copy of this letter ~~will be~~ sent to Colonel Alexander, and I'm taking the liberty of requesting him to contact your assistant, Mr. Griswald and arrange to show you the tape should you be interested in viewing it.

Note that reference 81 of the Tesla paper establishes that phi-field alone can alter the rate of flow of time, since it can produce a "relativistic" situation with concomitant time dilation. This of course is half my thesis in the paper. The other half -- that an ordinary electromagnetic vector wave is two coupled Tesla scalar waves -- follows from the 1903 Whittaker paper referenced in the paper.

I am also convinced that the Israelis have first generation A-field or Tesla weapons (not so comprehensive or powerful as those of the Soviet Union.) At least a top-ranking Israeli physicist is cooperating in phenomenology research in this area, underway in a secret laboratory in California. Two U.S. physicists, both friends of mine, have personally been in the laboratory. I also have the name and address of the individual who made the first device obtained by the Israelis in Toronto, Canada.

If you will check with the British authorities, you will also find that a British civil defense team in a fire station across from the Israeli Embassy in London once noted "deadly nuclear radiation" pouring out of the Israeli Embassy. At least the team's geiger counters indicated severe readings, emanating from the Israeli Embassy. A geiger counter does not measure nuclear radiation per se, but only its own ionization. Strong Tesla scalar waves (closely related to A-field waves freed from a del cross operator and hence freed from the magnetic field -- as Feynman describes in his second volume of physics) are pure
