Subject: Reducing oil cost

Mr. Hargreaves,

CNN could cause an immediate reduction in oil cost just by saying "The Japanese have a water fueled automobile on the street."

For video documentation, from a Japanese newscast, visit www.byronwine.com and click #13-V. Also in #13-V are videos of five more automobiles fueled with water, they use no gasoline.

Some documentation from my webpage is attached.

Is CNN "The most trusted name in news"?

Regards,

Byron Wine
