Subject: Your comments in CNN article

Hello Ms. Smith,

The CNN article "Gasoline: Painful, and getting worse" has your comments. EIA could cause an immediate reduction in oil cost just by saying "The Japanese have a water fueled automobile on the street.". Are you allowed to make that statement?

For video documentation, from a Japanese newscast, visit www.byronwine.com and click #13-V. Also in #13-V are videos of five more automobiles fueled with water, they use no gasoline.

Some documentation from my webpage is attached.

Regards,
Byron Wine
