Mr. Ralph Nader
(C/O FOR THE PEOPLE)
(FAX (804)-397-4149)

Dear Mr. Nader,

I attempted to find a direct address for you today. The person that I spoke with at Public Citizen said that to reach you that I must send my letter to that office. Since I've written four times to people in your organization, without receiving any response, that seemed like a useless exercise. (MS. Beaver, 1990; Ms. Claybrook, by certified mail, 10/30/91; Mr. Dilow, 1/6/92, Mr. Dyson, 4/23/94) All of that correspondence concerned very high MPG automobiles and other suppressed energy devices

The purpose of this letter is to inform you of the high MPG autos and other devices. I thought the information will be useful if a member of your staff attends the proposed EPA meeting concerning emission free vehicles (Washington Post, 7/28/94, page A29). I attempted to speak with someone at EPA concerning that meeting. However, since I am a "nobody" all I got was the run around.

If you are interested in any further information, I can document everything in the attachments.
