Office of the Governor
Patrick Henry Building, 3rd Floor
1111 East Broad Street
Richmond, Virginia 23219

Dear Governor Kaine,

As you know, residents of our state are burdened with increasing prices for food, gasoline, heating oil, electricity and many other necessities. All the increases are directly related to the cost of oil. Yet, a known replacement for oil has been known for over 200 years; that replacement is water. My webpage, www.byronwine.com, in #13-V, has videos of six automobiles fueled with the components of water; they use no gasoline. (If you want, at my expense, a DVD with these videos, let me know.) One of the videos is a clip from a recent Japanese news broadcast, another is of a Philippine inventor who has run engines on water for over 30-years. This technology has received little or no publicity from government or media.

Our state has many universities and colleges capable of demonstrating the existing water fuel technology. Can you request that one of the schools, or a state agency, have a public demonstration of this technology?

What will you do to bring this technology to our state and reduce the financial burden on residents?

Sincerely,

Byron S. Wine III
