Rulers,

An open letter to the Office of the United States Military Force

In the course of recent history there have occurred numerous events which give rise to our urgent concern as to where your immediate loyalty lies. Is it with the People of the several United States of America, or is it to the Commander in Chief and his cohort of advisors and controllers determined to bring us into a world social, economic and political order governed by the United Nations Organization???

In February, 1992, President George Bush told the United Nations General Assembly, "It is those Sacred Principles enshrined in the United Nations Charter to which we will henceforth pledge our allegiance."

This statement's conflict with the Founding Principles of this nation arouses concern in Freemen everywhere. Our concern is exacerbated by such events as these:

1) numerous Executive Orders signed by recent presidents which negate the authority of the people through their elected representatives to declare war, to ratify international treaties and to limit, appropriations, military activity peacetime;

2) a continuum of undeclared wars whose purpose and result remain clouded at best; treasonous at worst;

3) a growing propensity for the placement of various United States military units under foreign commanders;

4) an apparent change in policy and purpose of the United States military from the protection of the people of these several United States of America and their property to the furtherance of some vague and unspoken political, social and economic agenda;

**Krefeller
MERITUS**

5) the obviously unnecessary sacrifice of the lives and limbs of our fathers, sons, daughters and husbands in the implementation of that agenda;

6) numerous recent violent actions by agents and agencies of the federal government against the people of the several States; and

7) the apparent determination of a significant influence within the Congress and the present administration to disarm law-abiding Citizens of these several States and to deny us our ultimate protection against a potentially tyrannical government.

History is replete with examples of the people's worst enemy being

their own government taken over by power hungry despots. We have no reason to believe that human nature has changed - that, given the opportunity, evil men will impose their will upon the populace.

The form of government established by this Nation's founders is one of Law based upon absolute Principles, not upon the whim of individuals nor even of the majority of the people. They wrote a Constitution expressly limiting the authority of the federal government and denying to elected leadership unilateral and unquestioned authority.

You are reminded that your oath upon commissioning as an officer of this nation is to the sup-

port and defense of that Constitution and through it, the people of these several States. It is not to obey a Commander in Chief, nor even less to obey the orders of some presumed foreign authority.

You are further reminded that it is well established in international law that following the orders of a superior authority is no defense in your personal responsibility for any unlawful acts by military leaders.

It is with these points in mind that we demand that you make a personal decision and public commitment that, if and when you are ordered to take any action against the people of these several States or the Constitution established by

them, that you stand with the people and their Constitution, that you protect them from intrusion upon their rights, their persons and their property and that you defend them against all actions, either violent or non-violent, perpetrated by those, domestic or foreign, whose object is the destruction of the Constitution.

We call upon you to renounce any action in violation of the people or their Constitution, and to bring to bear all the forces under your command to the protection and defense of these high purposes.

In the Name of the Almighty Creator God, we will accept nothing less.
